SAFETY

For any construction project to be completed properly, Safety plays a crucial role in all aspects of human & property & equality and the safety given high safety. CHEVROX we believe in a safe working environment for all the time.

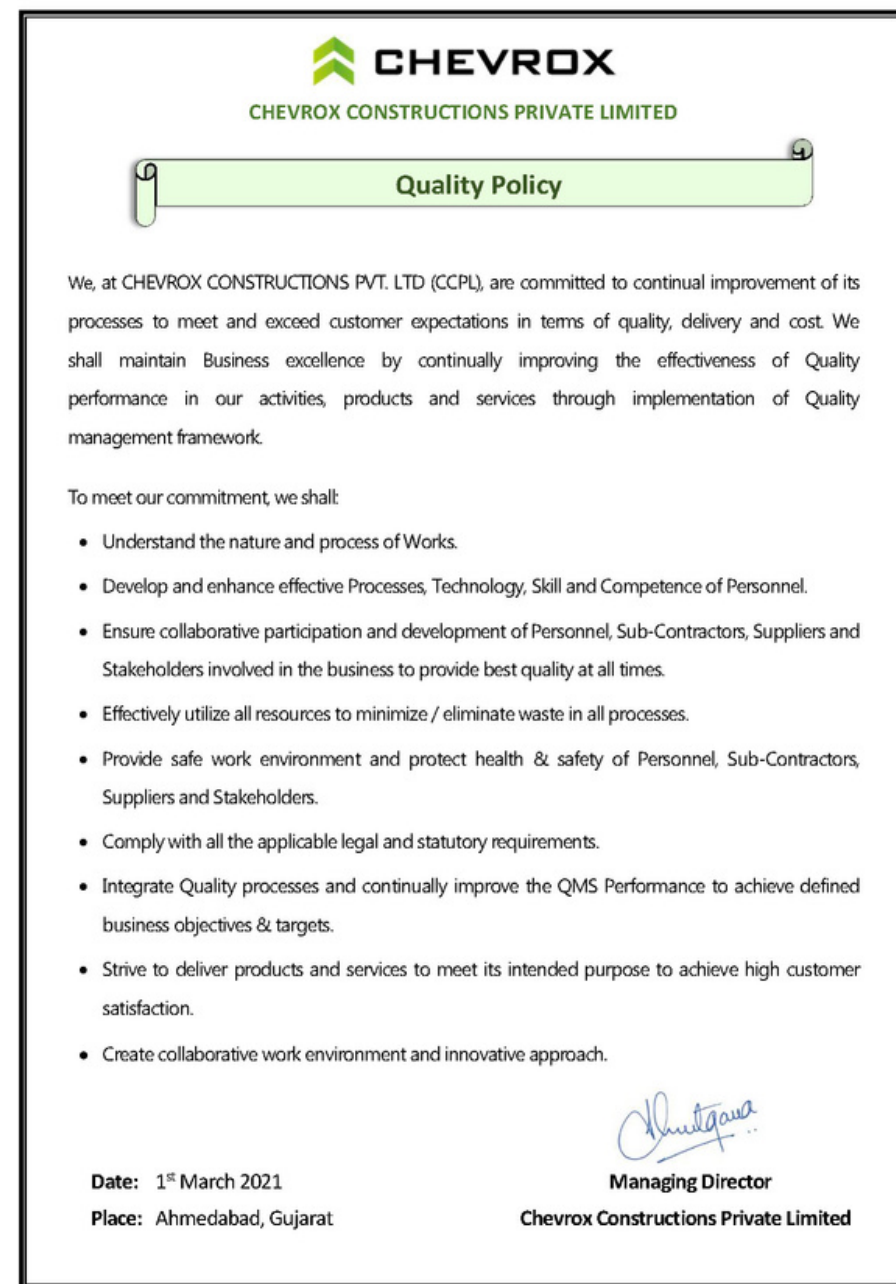

We consider the following measures to achieve a secure and safe working environment:

- Identify and recognize common safety hazards at the construction site, and make a safety plan to combat them
- Know the preventive measures to be adopted,
- Utilize manpower who are confident and experienced in working at high heights,
- Understand the importance of observing safety signs and safe work procedures,
- Understand importance of PPE and its limitations,
- Know every stakeholders rights and responsibilities.

In variety projects we have been appreciated and awarded for the Safety.

QUALITY BELIEF

In Chevrox, Quality is not the word.

Quality is not the policy.

Quality is not the aesthetics.

Quality is not the contractual conditions.

But Quality is the value for money.

Quality is an optimization of cost vs design.

Quality is the inherent strength of the project.

And Quality is the function of the project, which should work much more than it's desired and design period, it is intended for.
